UC Davis Health
2570 48th Street
Sacramento, CA 95817**

Our Goal

To identify gaps in research, technology and policy that are delaying the adoption of innovations to support aging in a digital world.

For more details, please contact Corey Owens at cowens@ucdavis.edu.

Aging in a Digital World

Our international summit is **postponed** due to travel restrictions related to the coronavirus outbreak. We plan to announce new conference dates shortly. We appreciate your patience and understanding during this process as we reschedule this exciting and impactful program that explores how changes in policy, technology and models of care can improve the lives of older adults, families and caregivers.

Our Vision

To create an interactive forum and networking opportunity for international thought leaders in aging, technology and health care policy research to:

- Understand the current challenges to implementing new models of health promotion and care for older adults and family caregivers.
- Explore novel methods for connecting clinical research and tech innovation.
- Examine the barriers to deploying evidence-based digital health solutions to older adults in all care settings, including the home.
- Discuss forward-thinking public policy that addresses the complex demands of an aging world.
